

ExtensionSentry Forensic Intelligence Report

Extension	Customer Research Helper
Version	2.7.1
Archive	test_extension(zip).zip
SHA256	ef89df09325d8cfdb0664948980da0cb11236ee55a47e6a18e07fea0a925e786
Risk Score	55/100
Threat Level	ELEVATED
Verdict	Review recommended

Executive Narrative

The extension shows moderate forensic concerns and should be manually reviewed.

Findings

HIGH - Sensitive Chrome permission declared: nativeMessaging

Bridge browser code to native host applications.

Recommendation: Confirm the permission is justified by documented extension functionality and minimize if possible.

HIGH - High-risk Chrome permission: cookies

Read or modify cookies.

Recommendation: Constrain capabilities with optional permissions and explicit user gestures.

HIGH - High-risk Chrome permission: scripting

Inject scripts into web pages.

Recommendation: Constrain capabilities with optional permissions and explicit user gestures.

HIGH - High-risk Chrome permission: tabs

Read tab titles, favicons, and URLs.

Recommendation: Constrain capabilities with optional permissions and explicit user gestures.

HIGH - Extension requests broad host access

The extension can observe or modify content across a large browsing surface.

Recommendation: Replace broad host permissions with exact domains and optional host grants.

CRITICAL - Dynamic eval execution detected

Eval can execute remotely influenced strings as privileged extension code.

Recommendation: Remove eval and replace dynamic execution with static dispatch tables.

LOW - Chrome tabs API access observed

Code paths interact with browser tab metadata or execution surfaces.

Recommendation: Review tab access paths and restrict them to user-initiated workflows.
