

ExtensionSentry Forensic Intelligence Report

Extension	Analyzed Chrome Extension
Version	1.104.1
Archive	googledocs_forensic.zip
SHA256	57a608610aff619cc18c11aa6c8b76515dfa34ae872062881e2bacfbcc0489d2
Risk Score	11/100
Threat Level	GUARDED
Verdict	Monitor

Executive Narrative

Low-severity indicators were detected. Keep the extension in monitored inventory.

Findings

LOW - Dynamic HTML DOM sink usage

HTML-writing sinks can become XSS vectors when paired with untrusted input.

Recommendation: Use safe DOM APIs, templates, and strict sanitization.

LOW - High-entropy minified JavaScript

Dense high-entropy code reduces reviewability.

Recommendation: Request readable source before approval.

LOW - High-entropy minified JavaScript

Dense high-entropy code reduces reviewability.

Recommendation: Request readable source before approval.

MEDIUM - Insecure HTTP endpoint references

The extension references endpoints that can be intercepted or modified in transit.

Recommendation: Use HTTPS for all remote endpoints.

MEDIUM - Suspicious external domain indicators

The extension references domains with risky TLDs or exfiltration-service keywords.

Recommendation: Validate ownership before deployment.
